## **Customer Announcement DH Instruments Acquired by Fluke Corporation**

Phoenix, AZ, Feb 19, 2007

DHI announces that it has been acquired by Fluke Corporation.

Fluke Corporation is a wholly owned subsidiary of Danaher Corporation. Fluke manufactures, distributes and services electronic test tools. A multinational corporation, the company is headquartered in Everett, Washington. Sales and service operations are located in Europe, North and South America, and Asia. Fluke's Precision Measurement business unit is concentrated on calibration products and services. They are an industry leader in metrology and successfully expanded their electrical calibration position into temperature calibration in 2001 with the acquisition of Hart Scientific.

DHI will be integrated into the Fluke Precision Measurement business unit. DHI will continue to operate from its headquarters in Phoenix, Arizona under current, local management.

DHI expects this development to bring major benefits to its customers. DHI and Fluke share common guiding values of metrological excellence and complete dedication to customer satisfaction. Fluke will help DHI support and sustain the tremendous growth it has enjoyed. Fluke and Danaher world-class manufacturing tools (the Danaher Business System, or DBS) will add operational improvements where appropriate to ensure timely delivery of high quality, high value products. The company will also gain access to a much larger international sales and service organization to improve its support to customers located outside the United States.

In the immediate future, the way customers do business with DHI is unchanged. Over time, DHI and Fluke will work together to seamlessly integrate sales and service functions to most efficiently respond to customer needs. We will work to keep you informed of any such changes that may impact how we work with you as they occur.
